2. Find your Yorkie's Age on the left hand column, age must be in weeks Example: 13 weeks old
3. Move to the right of the chart horizontally until you find your puppies current weight that you calculated in step 1.
4. Last, scroll down to the very bottom of the chart to see your Yorkie's full-grown weight.

Example: Your Yorkie would be 4.0 lbs full-grown
Old rule of thumb, triple the weight of an 8 -week-old Yorkie puppy and double the weight at 12 weeks.
